

Single **BOOM** Sprayer

for the Multi-Crop Produce Farmer, that is affordable and will do the job from sweet corn to melon crops!

Models Available • R1524 • F324 • F424

Why a single-side boom?

- Lets you spray the whole field without folding the boom at the field ends.
- With hydraulic leveling it is a lot easier to control one boom than two.
- Provides 50 ft. coverage between the drive rows for a fraction of the cost of a hydraulic fold 60 ft. boom sprayer.
- Easy boom height adjustment.
- Lower cost. This sprayer is designed to be affordable for the small to medium sized grower.

Sweet corn growers really like this sprayer!

20 Years Experience Building Sprayers

Built for vegetable growers by a vegetable grower. We are striving to keep the cost down without sacrificing quality and convenience. 200 PSI spraying still gets the best coverage in most all vegetable crops, especially in sweet corn.

Features of Boom Sprayer...

- 24 ft. single-side boom that provides a 50 ft. coverage pattern between drive rows. Up to 60 ft. with spray gun at end of boom.
- Easy, 60 second, manual boom height adjustment from 2 ft. for melons to 7.5 ft. for sweet corn.
- Hydraulic on-the-go boom leveling allows operator to maintain uniform height between boom and the crop.
- Pump driven with PTO power shaft for quick hookup.
- Adjustable wheel spacing, tongue height and control holder.
- Boom protected by rubber shock-absorber mounting.
- Disc Core spray tips for best foliage contact when spraying insecticides and fungicides.
- Top quality John Blue 215 PSI, 28 GPM diaphragm pump.
- **200 gallon trailer models F224**
- **300 gallon trailer models F324**
- **400 gallon trailer models F424**
- Off-the-shelf parts that are readily available from our parts stock, or from Hypro and Teejet parts suppliers. John Blue control valves with liquid-filled pressure gauge.
- Dual agitators with throttle valve requires no premixing of chemicals.
- 560 PSI pressure hose.
